

Pasos de requerimientos para la ejecución del proyecto.

Una vez creado el espacio de trabajo donde el cual se va trabajar se busca la sección de la terminal.

Se crea el espacio del proyecto con startproject.

Se crea el espacio de la app para poder ejecutar la app.

Se crea el entorno y así mismo se activa

Se hace la instalación de django

The screenshot shows the VS Code interface with the terminal tab active. The command `pip install django` is being run in the terminal, and the output shows the successful installation of Django and its dependencies.

```
PS C:\Users\Admin\Desktop\Parcial 3 C3> pip install django
Requirement already satisfied: django in c:\users\admin\appdata\local\programs\python\python312\lib\site-packages (5.2.7)
Requirement already satisfied: asgiref>=3.8.1 in c:\users\admin\appdata\local\programs\python\python312\lib\site-packages
  (from django) (3.10.0)
Requirement already satisfied: sqlparse>=0.3.1 in c:\users\admin\appdata\local\programs\python\python312\lib\site-packages
  (from django) (0.5.3)
Requirement already satisfied: tzdata in c:\users\admin\appdata\local\programs\python\python312\lib\site-packages (from django) (2025.2)

[notice] A new release of pip is available: 24.0 -> 25.3
[notice] To update, run: python.exe -m pip install --upgrade pip
PS C:\Users\Admin\Desktop\Parcial 3 C3>
```

Se hace un pip list para verificar que su instalación fue exitosa

The screenshot shows the VS Code interface with the terminal tab active. The command `pip list` is being run in the terminal, and the output lists the installed packages and their versions.

```
PS C:\Users\Admin\Desktop\Parcial 3 C3> pip list
comm                  0.2.3
contourpy              1.3.3
cryptography           46.0.3
cyclen                 0.12.1
debugpy                1.8.17
decorator               5.2.1
defusedxml              0.7.1
Django                 5.2.7
django-shortcuts         1.6
djangorestframework      3.16.1
executing                2.2.1
fastjsonschema           2.21.2
```

Se ejecuta el código Python manage.py runserver para correr el proyecto y ahí se puede verificar que su instalación fue exitosa.
